

HOMESearch SERVICE

A Home Search Solution.

Our Home Search Service includes:

A meeting or a telephone conference to establish your requirements and preferences

Identifying and previewing rental options to offer a shortlist of properties that most closely match your criteria

An itinerary for accompanied viewings on a date and a time that is convenient to you

Negotiation of tenancy terms and conditions for the selected property

The Apartment Service specialises in providing fully serviced accommodation and is a market leader in the Corporate housing and extended stay sectors. We use our experience in sourcing accommodation to help you find a long term housing solution. We tailor and provide a personalized, quality service to suit your needs as an individual or as a family.

Working closely with you, we will build up a profile of your preferences and requirements.

We will then contact local agents and property managers to identify properties that closely match your criteria.

We will preview the properties and draw up a short list. We will then compile an itinerary of viewings and accompany you on an agreed date.

Once you have selected your preferred property we will liaise with you and negotiate tenancy terms.
